

**ACMS brings
your projects
together.**

SPECIALTY GROUPS

CRITICAL THINKING. COLLABORATION. COMPLETION. RESULTS.

From the CEO...

I started ACMS from a simple idea – Owners need a single point of responsibility in capital projects. So, I bootstrapped ACMS into existence. Borrowed money, took risk, started a company. Our Customers responded, we prospered, and ACMS grew. Originally, ACMS served the refining and steel manufacturing industries southeast of Chicago, Illinois. We grew some more. The talent started coming to us – experienced engineers, constructors, craft tradesmen. And we grew some more. We built safety systems, inspection protocols, process. Our Customers recognized what they were getting. And we grew some more. As our breadth of services expanded, the company was renamed ACMS Group, Inc. As always, we pride ourselves in providing state-of-the-art consulting and design services, while maintaining the commitment to customer satisfaction.

Today, ACMS Group, Inc. provides experience and talent to the manufacturing and construction industries. We are very proud of our construction management and QA/QC capabilities. Beholden only to our customer, we “get it right” by providing independent project/construction management. We document your project with QA/QC services – your ‘as built’ drawings are exactly that – as built. Your job proceeds safely, with ACM industrial safety services catering to heavy industrial environments.

We’ve served steel, refining, power generation, natural gas, chemical, automotive, food processing and pharmaceutical clients across the United States. Please look through our website. I’m darn proud of ACMS Group, Inc. and what we’ve accomplished. We’re a team now. Bring your tough, complex construction jobs to us. This is what we do, what we are. Let us build/manage/fix your problems. Put us on your team. We want to grow with you.

*Thank you,
James J. DePaoli
President, ACMS Group, Inc.*

Live Line Repair Group

We utilize American manufactured pipe and flange enclosures and clamps. The latest technologies in sealants and packing for valves. Our Leak Repair Group handles leaks on steam, chemicals, acids, water, air and all process leaks.

On-Line Industrial Leak Sealing

- ▲ 24/7 Routine and emergency non-destructive on-line leak repair
- ▲ Reliable and safe controlled solutions for Hydrocarbons, Coke Oven Gas, Steam, Water and ALL process leaks
- ▲ Engineered repair solutions for temperatures ranging from cryogenic to 1700°F and pressures from vacuum to 3500 psig
- ▲ Valve packing, flange, valve and piping system leaks
- ▲ Meets all process safety management requirements

Composite Repair Systems

- ▲ Repair external/internal corrosion or other defects in piping systems
- ▲ Restore piping systems back to original design strengths
- ▲ ASME PCC-2 Article 4.1, 4.2/ISO 24817/Dot Compliant
- ▲ Engineered design and cost solutions available
- ▲ Repairs can be performed without any downtime
- ▲ Installed by certified trained technicians

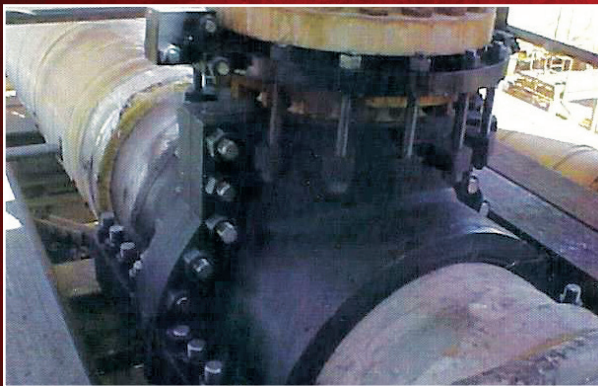

Composite Tank Repair

- ▲ Structural repair of steel tanks using carbon fiber composite systems
- ▲ Return original design strength to tanks
- ▲ Seismic reinforcements add strength without increasing load
- ▲ Turnkey service requires no downtime
- ▲ 20-50% cost savings over traditional repair methods

Concrete Epoxy Specialists

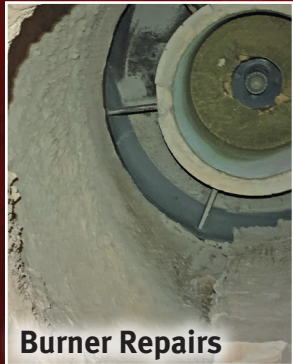

- ▲ Pickle line acid leak/acid tank repair 24 hr emergency repairs
- ▲ Water proofing/sealing, epoxy crack injection
- ▲ Concrete restoration/grouting
- ▲ Epoxy coating of containment walls to full ph scale

Refractory Concrete Restoration and Epoxy Specialists

Burner Repairs

Pickle Line

Boiler Repairs

ACMS Group proudly supplies a highly experienced group of refractory concrete restoration and epoxy specialists to Indiana. We focus on achieving your goals and making your project a success. We are dedicated to delivering every requirement identified by your company safely, on time, and within budget.

24 Hour Emergency Repairs

- ▲ Pickle line acid leak and acid tank repair
- ▲ Waterproofing and sealing, epoxy crack injections
- ▲ Concrete restoration and grouting
- ▲ Epoxy coating of containment walls to full pH scale

Self Performing Masonry

- ▲ Brick- Repairs, tuckpointing, and new projects
- ▲ CMU (Block)- Repair and new projects

We have staff with knowledge and experience in masonry. This allows us to assess a damaged wall or structure that may require demolition or building a new structure to your specifications.)

Self Performing Refractory

- ▲ Gunitite-Large projects and small repairs
- ▲ Shotcrete-various applications
- ▲ Ceramic Fiber- Modules, Pyro Block, and Blanket
- ▲ Brick-Kilns, ladles, furnaces, vessels, and more
- ▲ Insulating Brick-various applications

Equipment Grouting

- ▲ Cementitious grouts
- ▲ Pumped/Poured/Dry packed
- ▲ Fast setting/Precision/Non shrink

Chemical Grouting

- ▲ Repairs to leaking cracks and joints
- ▲ Hydrophobic/Hydrophilic urethanes

Concrete Repair

- ▲ Acid/Chemical resistant coatings
- ▲ Epoxy injection
- ▲ Spall repairs
- ▲ Structural reinforcing and cosmetic repairs
- ▲ Joint repairs/sealants
- ▲ Cathodic protection systems
- ▲ Formed concrete repairs
- ▲ Carbon fiber/fiberglass
- ▲ Food grade coatings
- ▲ Additional composites by request
